

A REMOTE MANAGEMENT TOOL FOR YOUR ATMS

PAI REPORTS

eRMS

YOUR ATM

Introducing eRMS

PAI's all new eRMS program allows you to operate and manage your ATMs with ease. Some of the features include:

Instantly retrieve the ATM journal remotely to ensure you never miss another claim

Update EMV and Application ID (AID) settings which significantly reduce lost transactions, fallback fees and keep the ATM compliant with current EMV standards

On-Demand software updates to keep ATM fleets updates with the latest security patches and revenue generating services

Complete control of ATM surcharge updates provide the advantage of optimizing revenue for special events or other business needs at the click of a button

Fault recovery automation methods will reduce tech visits and ATM downtime for dispenser bill jams and other ATM issues

Constant monitoring capabilities which ensure ATM issues are quickly identified and notifications are sent before customers are aware of any problems

Accurate ATM information available within our PAI Reports website, helps make key business decisions and provide a higher level of support from our PAI Solutions Centre teams to quickly resolve major ATM problems

Provide an eRMS Command Console that allows customers access to perform ATM remote commands such as:

- Reinitialize the ATM
- Reboot the ATM
- Retrieve the ATM status and setup information
- Retrieve and set bill count information along with performing Trial and Day totals
- Configure various ATM programming settings
