

VetPAY Solution Brief

Built for Your Practice

VetPAY by Payment Alliance International enables practices to maximize the benefits of a customized financial process — increasing collection ratios, decreasing accounts receivable, gaining more profits, and improving patient satisfaction.

VetPAY allows you to focus more on patient care and less on the financial concerns of your practice.

VetPAY Point-of-Sale

VetPAY POS offers practices the most efficient system to process credit and debit cards, checks, and cash payments.

TransactionManager

Recurring and account-on-file payment processing is integrated directly into VetPAY. Increase collection speed on insurance balances by accessing payment details from a patient's activity history. It's smart, it's easy and it increases cash flow to your practice.

Online BillPay

Allows practices to utilize VetPAY to manage their accounts receivable, email invoices to customers and receive electronic payments — all without a website or expensive accounting software.

RemoteDeposit

RemoteDeposit enables you to deposit checks from the convenience of your practice, saving money on office staff hours and increasing your cash flow. Eliminate the preparation of deposit slips, trips to the bank, and waiting in lines. With RemoteDeposit, you simply run your patient and insurance checks through the VetPAY system to electronically deposit checks into your specified banking account with 100% next day funding.

Financing: 3-Months, No Interest — No Credit Application

Our program has a high approval rate and enables your practice to offer a short-term financing option with NO risk of returns — averages 70% acceptance.

Book more cases and increase profits with our revolutionary deferred deposit plan that guarantees funding to your practice within three days of approval.

Here is How it Works

- Up to four checks may be accepted for a single transaction
- First check is written for at least one-third of the total transaction amount
- Remaining two-thirds is split into three checks deposited in 30, 60, and 90 days
- Practice and patient execute deferred deposit agreement (supplied by us)
- Checks are authorized by telephone in minutes
- Checks are imaged for auto-deposit
- Practice receives advanced funding for full amount within three days of transaction — with no risk of returns!

"In today's market, we have company after company competing for our business. I have found that most run their businesses like a single transaction. Payment Alliance International, however, focuses on individual needs and customer service.

They care about their clients. That's why we enjoy working with them and recommend Payment Alliance International to the dental community."

Craig C. Longenecker, DDS
Hereford Dental Health
